Tea filling Station to Move.

Hill's snack shop and Home of the Hamburger will shortly be moving South—one door. The premises formerly occupied by Mr Sinner and the office of William Fuhr have been merged into one room. Mr H. Larson, the well-known chef, will find this a much larger and more commodious salon when his guests gather, to feast on his culinary delicacies and other interior decorations. When the contractor has completed his work, invitations will probably be issued, announcing the date of the opening performance.

Broadcasts at \$4000 an Hour

That the recent Federal election was the most costly ever held in the Dominion, is the verdict of those who claim to know. It has been estimated the cost of each vote was around \$1.00. The electrical machinery cost the Treasury about four million dollars. One of the most expensive items for the various parties was the radio. A national broadcast, taking in 50 stations or more, for an hour, cost \$4000, and for 30 minutes it cost something like \$28.00. This was an expensive business, and there was no way of knowing whether the speaker was greeted with "a full house" or whether he had been dialed in by a number of receiving sets.

"Inside Information."

(Edmonton Journal, Oct. 12.)

"I am going to let you in on some inside information. I am not going to make any promises, but I am in a position to tell you people that you are likely to be buying your Christmas presents with your basic dividend."

This was the statement made by J. A. Reid, the Social Credit candidate for West Edmonton, when addressing a meeting in Splan school, Winterburn, Friday night.

"There is being printed now in Edmonton a questionnaire that is going out to every citizen of the province relative to bona fide citizenship qualifications. The next move is the payment of basic dividends. If you are a bona fide citizen when you return the questionnaire you will very soon receive the dividend," Mr Reid continued.

Interviewed by the Journal Saturday, Mr Reid confirmed the report that he had forecast the payment of basic dividends before Christmas.

"Did you mean that people would be receiving their dividends before the end of the present year?" Mr Reid was asked.

"I meant that there was a good possibility of it," Mr. Reid replied.

"Have you any inside information on this?"

"I know that the questionnaire is now being printed."

"Could you say how soon after the printing of the questionnaire it will be before the Government starts to pay out funds to citizens?"

"I expect it will take some little time to get the printing completed and the questionnaire returned by the 'citizens.' Mr Reid replied.

The Relief Expenditure Burden

With the Federal elections over and the political complexion of the next Parliament of Canada defined, the government of the country will be faced with a number of important problems to decide, and not the least of these is the question of the steps which must be taken to ease the debt burden of governmental units in Western Canada.

By governmental units is meant the governments of the provinces and of the municipalities, urban and rural.

During the past five years the public finances of the Western Canadian provinces and of the municipalities, which are their creatures, have been strained to the breaking point to meet the problems which drought and general depression have brought in their train.

Not only has the public purse of the Western provinces and of the municipalities been depleted in the struggle to ensure that their citizens should not starve, freeze or go shelterless in their grim fight against great odds, but they have been obliged to pledge their future resources, to an alarming extent, to enable the citizens of the present generation to keep their heads above water.

In the three prairie provinces millions of dollars have been spent to furnish a substantial percentage of the population with food, fuel and clothing, and in the urban centres with shelter as well; and this, despite the fact that the Federal government has also contributed large sums to bolster up the provinces and the municipalities in their fight to ensure the necessities of life for their people.

In addition, however, to the money which has been expended out of current revenues these provincial and municipal governments have pledged many more millions of dollars against the credit of the future earning power of the people, a debt which will have to be liquidated in the future either by the taxpayers of to-day or by the rising generation, or a combination of both.

Without going into statistics which, at the best, make dry reading, it is axiomatic to say that the indebtedness which has been piled up on this count, directly and indirectly, reaches a staggering total and has passed the figure which is within the competence of these governmental units to meet from existing resources.

One of the conditions contributing to the existing condition of the finance of the Western provinces and municipalities is the inequability of the distribution of the tax burden as between individual taxpayers and the inequability of the distribution of the bases of taxation as between the federal, provincial and municipal governing entities.

The financial situation which developed as a result of these inequalities is one which will have to be faced and remedied by the newly-elected Parliament if the Western provinces and municipalities are to remain solvent and are to be enabled to extricate themselves from a position which has become intolerable.

So far as the municipal governments are concerned, their financial plight has been accentuated by practical limitation to reality as, at least, as the principal tax base, and this applies to both rurals and urbans, only in different degree. Land has more than passed the limit of its endurance as a source of revenue for governments. Other spheres of taxation are denied to the municipalities, and this is one discriminatory feature which will have to be remedied.

In seeking additional sources of revenue municipalities are cramped by legislative action of their superior provinces and the provinces in turn are hampered by Federal authority.

What is needed is a nation-wide conference in which the municipalities can get together with the provinces and the Dominion and, in a spirit of tolerance and recognition of the difficulties of one another, come to an agreement which will provide for specific delimitation of spheres of taxation and a definite understanding that the several governmental units will not in future encroach upon one another's taxation preserves.

This understanding should be translated into legislative enactment and if it involves amendments to the British North America Act, as undoubtedly it would, efforts should be made to secure the necessary sanction.

The problem of relief, it has been reiterated by competent authorities time and again, is a national one. The provinces have said so. The urban municipalities have said so and the rural municipalities hold the same view, even if they have not adopted resolutions in convention to that effect.

If the Federal government is not prepared to recognize the situation in regard to the financial problem, the only alternative is for the Federal government to make it possible for the provinces and municipalities to liquidate past, present and future expenditures by providing them with the machinery to levy the money where the money is available.

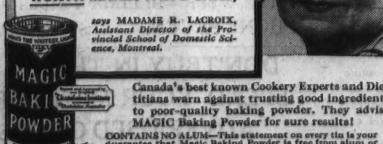

One hundred sixty-six thousand acres of land were set aside by China for an experiment in raising cotton from American cotton seed.

An ethnologist finds that not only lemons themselves but the name, with slight modifications, spread from India to far corners of the globe.

DON'T RISK BAKING FAILURES . . .

"YOU CAN'T BAKE GOOD CAKE WITH INFERIOR BAKING POWDER. I INSIST ON MAGIC. LESS THAN 1¢ WORTH MAKES A BIG CAKE."

says MADAME H. LACROIX, Associate Professor of the Provincial School of Domestic Science, Montreal.

Canada's best known Cookery Experts and Dietitians warn against trusting good ingredients to poor-quality baking powder. They advise MAGIC Baking Powder for sure results!

CONTAINS NO ALUM—This statement on every tin is your guarantee that Magic Baking Powder is free from alum or any harmful ingredient.

Beauty In Old London

Pictures Of Infinite Variety Can Be Seen From Great Bridges

Old St. Paul's, perched high on Ludgate Hill, once a commanding position, is being gradually crowded out by other buildings. The most impressive sight of Wren's venerable cathedral is that looking from Fleet-street up Ludgate Hill. I have heard jaded newspaper men, familiar with Fleet-street at all hours of the day and night, grow lyrical about the loveliness of that glimpse of St. Paul's at dawn.

A great white London seems to have sprung up like magic. But it has not obliterated the past, and one of the charms of a walk through the city is the unexpected glimpses one gets through its narrow courts and alleys of old taverns, little shops, and ivied churches that have stood unchanged through the centuries.

It has been said that one cannot walk a hundred yards without seeing a bunch of trees. That is almost completely true. In fact, there are enough trees in the London streets and squares to make up, if placed together, a very respectable forest. Who has ever noted that there are over seventy trees in the Strand?

But nothing excels the river views. Wherever one looks, or from whatever angle of the seven great bridges from the Tower to Lambeth, there is picture after picture of infinite variety and beauty. At night, when the Embankment sparkles with its thousand lights, the view from the bridges of London's curving waterfront has the quality of pure magic. No Whistler nocturne could do it justice.—Overseas Daily Mail.

Serum For Paralysis

Demonsation Is Made Of New Treatment For Dred Disease

A serum he said was an positive and effective for the treatment of infantile paralysis, the vaccine widely used in treating diphtheria was demonstrated by Dr. E. C. Rosenow of the Mayo Foundation, University of Minnesota, before members of the Kentucky State Medical Association.

The serum, Dr. Rosenow told the assembled physicians and surgeons, is the result of 18 years of experimentation and while it does not completely solve the problem it is effective when used within 48 hours after the disease is contracted. Within that period it is as effective and positive as the serum used for diphtheria. Dr. A. T. McCormack, secretary of the Kentucky state board of health, said the demonstration made by Dr. Rosenow was "pretty conclusive."

Dr. A. T. McCormack, secretary of the Kentucky state board of health, said the demonstration made by Dr. Rosenow was "pretty conclusive."

Strange City In Arabia

Streets Of Lamp Lit With Ruins Of Many Palaces

Lamu, an ancient Arabian city of mystery, is built upon a little island not far from Mombasa in the Kenya Colony. The streets of this strange municipality, which are so narrow that the sun scarcely even shines in them, are lined with the ruins of many palaces. The inhabitants of Lamu are descendants of the old Persians who founded a colony on the island about A.D. 700, and are very proud of their aristocratic origin and traditions; for more than a thousand years ago their ancestors had produced great poets, architects and jewelers. The population makes a living by cultivating coco-palms, by fishing and collecting ambergris.

A Rainbow Snow Storm

Beautiful Layers Of Varied Colors Fell On Australian Alps

Colored snow fell on the Australian Alps for the second time this winter. It changed the landscape around Hotham Heights from white to chocolate within a few hours, while at Mt. Buller the inhabitants woke to see a bright red layer of snow half an inch deep. The noon hour snow had blotted out the red layer. The most remarkable fall was at St. Bernard's Hospice, where pink snow fell in two layers, an inch and a half thick, with a 6-inch strip glittering white snow sandwiched in between.

A German photographer has invented a camera film from which a single negative can be removed for developing without exposing the other sections of the film.

Tokio Subway Ultra-Modern

Goes One Better Than Those Of Other World Cities

According to passengers recently returned to Seattle, Wash., on the President Jefferson, Tokio's subway combines the best features of the New York and the Paris systems and the London tube, with a few added attractions of its own. Coins in the slot machines are magnified, so that guards may detect spurious money. White enamel straps snap back into place when not in use. Automatic doors have soft edges which may bump but not scar the slightly tardy passenger. Cars carrying 200 passengers leave a station every three minutes.

One copy of every book published in England must by law be supplied on demand to certain specified libraries, including the Bodleian Library at Oxford and Cambridge University library.

The aeronautics industry in the United States produced \$44,000,000 worth of aircraft and parts in 1934.

Lauds Canadian Flyers

Rear Admiral Byrd Says Dominion Pilots Best For Arctic Exploration

A tribute to Canada's north country flyers was paid at Toronto by Rear-Admiral Byrd, famous United States Antarctic explorer. Replying to Mayor Simcoe's welcome at a civic reception outside of city hall, Admiral Byrd said Canadians knew of flying better than any other pilots. Long experience flying over snow and ice and in sub-zero weather made them excellent pilots for Arctic or Antarctic expeditions, he said.

Spars For Royal Yacht

Two huge spars of Douglas fir, one 103 feet and the other 90 feet, dressed, have been shipped from Cowichan Lake to Great Britain, where they are destined for His Majesty's yacht Britannia.

Londoners became so unaccustomed to carrying umbrellas during fine weather that on a recent wet weekend they left 1,158 umbrellas in buses, tubes or trams. This was a record.

Free Samples of Vick Aids To Better Control of Colds Offered by Local Druggists

Trial Packages Contain Vicks Va-tro-nol, Vicks VapoRub And A Home Guide to Fewer and Shorter Colds — Druggists Also Have Free Samples of Vicks Medicated Cough Drops

Thousands of Canadian families have already gained greater freedom from colds—with the help of the famous Vick's Plan for Better Control of Colds.

Developed by the makers of Vicks VapoRub, this home guide to fewer and shorter colds is commonsense and medically sound. It is based on 30 years of practical experience and research by Vick's medical specialists in the study of colds. Its worth has been demonstrated not only in everyday home use, but also in extensive clinical tests under medical supervision.

And now, to encourage Vick's Plan families in this section—local druggists are distributing free trial packages containing complete details of the Plan and samples of the Vick's Plan and samples of the Vick's Colds-Control Aids.

Aid in Preventing Many Colds

Discovery of Vick's Va-tro-nol, unique in its ability to relieve colds, made the Vick's Plan possible. Especially designed for the nose and upper throat where most colds start, Va-tro-nol aids and stimulates Nature's own functions to combat colds and to throw off head colds in the early stages.

Va-tro-nol is easy and convenient to use—any time or place. Just a few drops up each nostril at the first nasal irritation, sniffle or sneeze. Used in time, it helps to avoid many colds.

Family Standby for Relieving Colds

If a cold has developed, or strikes without warning, Vicks Vapo-Rub—the family standby for relieving colds—helps to end it quicker. Simply rub it on the nose and at both nostrils. Vicks Vapo-Rub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster; (2) By inhalation of its penetrating, medicated vapor directly into the lungs.

Through the night, this combined vapor-poultice action loosens phlegm, soothes irritated membranes, helps the congested nose. Once by morning, the weight of the cold is gone.

(Ever since the introduction of Vicks Vapo-Rub, millions of people have used it and they would a cough drop, by melting it in the palm of the tongue. Now in Vick's Medicinal Cough Drops, the throat-soothing ingredients of Vicks Vapo-Rub are available in convenient candy form—a really medicated and distinctive type of candy.

Get Your Free Samples Today

Don't forget—your druggist has a few free trial packages of these Vick Aids to Better Control of Colds. See him today, before they're all gone. These packages contain all the information and need for following Vick's Plan. Test the samples—then prove what Vick's Plan can do for you and your family. You'll find it easy to follow in your own home.

Youth From Many Lands Give Views On How To Maintain Peace of the World

The following quotations are extracted from essays submitted to the New Haven Society in its three competitions offered to students of the universities and colleges of the United States, Europe and South and Central America, Mexico and the West Indies, on How Can Colleges Promote World Peace? How can the Youth of the Universities and Schools contribute to the Realization of a United States of the World? How can the Youth of the Universities and Professional Schools contribute to the Reconstruction of the Human Commonwealth?

Keep alive the will to peace and the will to sacrifice for peace.—Australia.

The nations must abandon the principle of colonization, which consists of enriching themselves at the expense of the colonized peoples—Belgium.

Youth must free itself of excessive respect for dead traditions and rouse itself from the contemplation of ideals which it needs must dethrone.—Brazil.

Let us irreversibly refuse all military service.—Brazil.

Whomsoever ideas can develop only in the sunlight of liberty, which turns to dust everything intrinsic to the natural principles of the people, who of themselves know the best remedy for their wounds—Cuba.

Turn to the youth which wants peace and a better life—the old do not understand—Czechoslovakia.

Through the industry of youth at the universities and schools, through the donations of the rich, the United States and the world should, within a few years, become a reality.—Denmark.

Humanity can be better served by youth at a low-cost than it has been by mature generations at a high cost.—Ecuador.

The creation of the United States of the World depends on mutual understanding, and this will only be possible through the use of a universal language.—Estonia.

Let youth believe, now and always, that other nations also seek that which is beautiful, true, just and right—Finland.

Let the nations die so that humanity may live!—France.

Our goal is peace and the realization of the United States of the World. We wish to enlist in the service of this ideal, and, in its name, become the heroes of peace.—Germany.

Warfare will continue just as long as public opinion does not object—Great Britain.

Youth! Unite, if you wish to succeed!—Greece.

Promote among the youth those virtues which will make them citizens of the United States of the World—Holland.

It is impossible to realize the United States of the World so long as absolute sovereignty and independence prevail.—Hungary.

Boycott the lectures of professors who sympathize with militarism. Develop a vast agitation against war.—Italy.

If youth understands itself to-day, it will unite the world to-morrow.—Jugoslavia.

Youth holds in its hands the key to the United States of the World.—Latvia.

The youth of the colleges and schools must be united in an International Student League.—Lithuania.

We certainly need new teachers; otherwise the young will sing the same old songs.—Luxembourg.

Our first duty is to believe in the good will of others.—Norway.

Man! Be a citizen of the world!—Poland.

The Franco-German problem is the most important of all. If we're satisfied, confidence would be re-established in the whole world.—Portugal.

Youth must free itself from the prejudices of a bankrupt society—Rumania.

There are about 15.8 square feet of skin on the average human body, according to a new method of figuring this mathematical-medical problem.

Liability On Any Farm

Dog Improperly Trained Is Harmful To Livestock

A dog is very useful servant at the farm if it is trained and properly trained. But, a brainless dog is a liability on any farm where live stock is kept. Some people have the habit of setting the dog on the cows or pigs and sending them helter-skelter out of the yard or field. As a rule animals so dogged are always nervous and it is impossible to get near them in the field or paddock. We like to go into the pasture and view the cattle come to us rather than flee away.

A reader of the Farmers' Advocate recently wrote asking if dogging cows did them any harm, and particularly wanted to know if it made churning difficult? We do not know about dogging cows causing difficult churning but we are satisfied that it will affect the milk yield and possibly the fat test. A good deal of loss has resulted one way and another by having a fast working dog behind the cows when they are being put into the stalls.

A dog will save many steps, but train it to walk the cows rather than run them. If it won't do this, then it has no place on a live stock farm. Some dogs are very easily trained if they are in the right hands while other dogs never seem to learn.—Farmer's Advocate.

Standard Has Been Raised

High Production Expected Makes It Hard For Cow

We were reading something to-day about a cow which in a year produced 1,400 pounds of butter fat, and we learn that even that high standard does not entitle the cow to top place in the honor roll. It was also stated that farmers and dairymen were not well advised to keep cows which would not start moving up toward the higher reaches of production. And that of course may be so. "Weed them out" was the short phrase directed toward the cows which were doing only fair work or something not quite as good as that. That is a hard sort of phrase from which mercy and sentiment have been stripped.

So we fear if that idea travels, it is going to be hard on the which which run down to 400 pounds of butter fat during the milking season which can be regarded, we suppose, as the fiscal year of the cow. Under such circumstances it is going to be tough being a cow, much tougher than it used to be.—Stratford Beacon-Herald.

To Safeguard Motorists

New Device Claimed To Remove Danger From Carbon Monoxide Fumes

Seven years in development, a device perfected by two Winnipeg garagemen will remove from motorizing the menace of poisonous carbon monoxide fumes, they claimed.

The invention, they said, ensures complete combustion. It consists of a small cylinder fitted over the intake in the manifold of an automobile motor at the back of the carburetor. From a small can on top of the cylinder a chemical feeds into the manifold as the motor starts.

The inventors, John Forbes and W. Denry Overall, claim the chemical reduces the amount of carbon monoxide to about one per cent. They estimated it would, with their device in operation, take 12 hours in a closed garage 12 by eight feet to kill a man.

Father took his small son to church. The clergyman announced: "We shall now sing hymns two hundred and twenty-two. Ten thousand times ten thousand." Two hundred and twenty-two.

The puzzled boy asked his father, "Dad, we don't have to work this out, do we?"

"Father took his small son to church," the clergyman announced. "We shall now sing hymns two hundred and twenty-two. Ten thousand times ten thousand." Two hundred and twenty-two.

First half of cotton exported from the United States to Europe was shipped from Charlestown, R. C., in 1784.

France Has Big Industry

Billions Of Flowers Turned Into Perfume Every Year

That women all over the world may indulge their fancy in exotic scents, billions of blossoms are turned into perfumes every year by the factories of Grasse, France.

Statistics issued by the perfume factories for 1934 show that more than 10,000,000,000 jasmine blossoms were used for perfume. Forty million pounds of roses were required and 50,000,000 pounds of orange blossoms. Flowers from Grasse, known the world over as a perfume manufacturing centre, are sent to all parts of Europe in special trains to other factories.

Hundreds of tourists who come to the Riviera visit the factories and view the process of perfume making from the gathering of the flowers to the distilling and bottling of the essence.

May Re-Open Branch

Alberta Provincial Savings Certificate Branch May Again Open At Edmonton

Negotiations have been started between the Alberta government and the federal authorities toward the re-opening of the provincial savings certificate branch in Edmonton, Premier Aberhart stated. The branch was closed shortly after the election, and payment on savings certificates suspended pending the taking over of the administration by Mr. Aberhart from the United Farmers of Alberta government.

A Queen Anne silver tea kettle was sold recently in London for \$1,395.

Graphic Description Of Fury Of Hurricanes That Beset The Caribbean Sea

Hurricanes, according to a writer in the New York Times, have their origin in the quietest section of the ocean known as the Doldrums near the equator. But until they reach the West they do not gather. Then force.

How the hurricane actually starts men do not know. They talk of convection and other theories, of upward-moving currents of air, of condensation and pressure, and of air rushing in to sweep in a faster and faster spiral. Finally centrifugal force make a hole in the centre, where no storm rages and where are slowly ascending currents of air. Those who have seen a hole grow larger and larger in water escaping from a circular washbasin have seen this process at work on a small scale.

But by the time this happens the tropical cyclone, as it is technically called, has got up such a speed that it is in a roaring and devouring master. When it first appears it is reported, generally on the east of the Windward and Leeward Islands at the southern end of the Caribbean; it may be 300 miles in diameter, the centre travelling at twelve or fifteen miles an hour and the whirling air mass attaining unbelievable speeds. Some of the gusts have been estimated at 180 to 200 miles an hour—estimated because the wind instruments invariably blow away. The speed has been calculated by the force necessary to push over heavy

stone monuments.

It is impossible to stand up in a wind of more than 100 miles an hour, and most Americans at this point in their existence think it very difficult half trying. They tear structures apart, whip trees to pieces and strew them across the settlements, pick up every kind of loose boarding and whirl it through the air at a rate which is as deadly as it is terrifying.

The bending palms and other trees, the shrill whine of the wind through this vegetation, and the deep growl of heavier currents as they race across a town make every human and animal thing realize how puny is their force against the storm. There is a constant cannonade, as though gun spray were a battery of field guns laying down a barrage. It is impossible to stand, the vision is constricted to a few feet, and the senses are numbed and dulled by the vicious pounding of wind pressure.

If one is fortunate, or unfortunate, enough to be able to see some few feet through the mastodon of rain and wind, there is a confused sense of the world's normal beauty in fragments. Bits of trees, roofs of houses sliced by on the wind as though they were pieces of paper carried upon the storm; weight has lost its gravitational power, and sheet iron is a floating tissue.

Above all is the howl, the pounding howl, of wind battering things to pieces, plucking at the surface of the earth with fingers that draw and lift and suck into the whirlwind above.

Finally the storm passes, or seems to. There is a lull, and the wind dies to a complete calm in which one may see a piece of paper sucked upward. This is the center of the storm, the hole in the whirlwind. Perhaps there is clear sky above, the sun may shine down for a moment. There is a peace that is a solace to worn nerves. But those who have been through hurricanes know that this is merely a temporary calm. Captains of ships who find their way into this silent area plot their way carefully that they may get out on the easiest and shortest storm path—for they know that the storm is coming again.

To live through a hurricane on the coast is to get the impression of a world gone mad, of the universe juddering at the earth with spasms of dim and slanting light, of water that pours horizontally across the horizon, a few feet away, of tangled bits of woodwork flying by on wings of thunder and crashes of metal and timber, of trees pierced by silvers of wood, of men and women fleeing from demolished houses and clinging to the base of a tree or pole while the debris of a river world goes by them with insane fury.

One Of Oldest Spices

Peppercorn Grows On Creeping Vine In Tropical Forests

Pepper is one of the oldest spices known. Hippocrates used it as a medicine. Pepper differs from most other spices in this, that its pungency resides not in the volatile parts or essential oil, but in a substance of a more fixed kind, which does not rise in the heat of boiling water. The pepper which, when ground is the familiar black or white pepper, grows on a creeping vine, usually at its best in the moist heat of a low-lying tropical forest. When pepper is cultivated on a large scale it is a common practice to plant trees to support the creeper and provide shade. When the berries are changing from green to red, they are collected, and dried in the sun until they become black and shrivelled. Ground in this condition, they produce black pepper. If white is required the black skins are removed.

Side-lighting, where the source of illumination comes from the side of the object to screen and back-lighting, where the light comes from the rear, are not difficult to handle if the lens is protected from the light coming toward it. Shade the lens from the side and screen the light from the rear. If the shade is too great, the shadow of a tree to make the exposure more for the parts in shadow than for those that are high-lighted.

Don't be discouraged if you fail to get the desired appearance of depth or "third dimension" in your first努力. If at first you don't succeed, watch for perspective and shade, grow and try again.

JOHN VAN GUILDER, 1620. They rent for \$1 a year.

The SNAPSHOT GUILD THAT THIRD DIMENSION

Above — Heavy shadows contribute much to third dimension quality. Left — Contrast in tones and masses of top lighting contribute to the rare stereoscopic effect.

+ +

How many times have you heard the expression "Don't take a picture with your camera facing the sun"? It's one of the old beliefs in photography, but it has not been handed down from year to year to every new snapshotter.

While this is good advice for the beginner, it is not necessary to forego shots by the sun. Those who like to try breaking such rules have found that most of the work of which we are proud has been produced under other lightings. The lighting is the key to results. The only precaution necessary when dealing with a water foreground in strong sunlight is to watch for a swell or wave does not throw a sharp light into the lens, as that may fog the picture.

The lighting of the subject has much to do with the third dimension. The way in which a photograph may be given apparent depth or "third dimension" is by lighting. Taking photographs when there are heavy shadows, getting a reflection in the foreground, using strong side-lighting or back-lighting, and timing the exposure just right so that a shadow is not blocked out, are precautions that contribute to the desired effect. Let us consider each of these separately.

When you are down in long drawn-out splotches across walls and walls, more than anything else make one feel of "looking into" a picture, as though it were a piece of paper. The images of the objects recorded

in the foreground should be well broken up with shadows so that there is not too much contrast between the foreground and the background.

When a body of water can be included as a part of the foreground, there are wonderful opportunities for adding depth. The reflection of the water is a good example.

The only precaution necessary when dealing with a water foreground in strong sunlight is to watch for a swell or wave does not throw a sharp light into the lens, as that may fog the picture.

Side-lighting, where the source of illumination comes from the side of the object to screen and back-lighting, where the light comes from the rear, are not difficult to handle if the lens is protected from the light coming toward it. Shade the lens from the side and screen the light from the rear. If the shade is too great, the shadow of a tree to make the exposure more for the parts in shadow than for those that are high-lighted.

Don't be discouraged if you fail to get the desired appearance of depth or "third dimension" in your first effort. If at first you don't succeed, watch for perspective and shade, grow and try again.

WORLD HAPPENINGS BRIEFLY TOLD

Five hundred British Guiana negroes at a conference in Georgetown, sent a petition to the king through the colonial secretary asking to be allowed to fight for Ethiopia.

An educational campaign against gambling will be instituted by the Social Service Council of Canada, it was announced in a bulletin recently released.

A father and son are receiving old age pensions at Duck Lake, Sask., according to the secretary-treasurer of the municipality. The father is 96 years old; his son, 70.

A hurriedly lettered sign, "closed until after the war—gone to Ethiopia," appeared in the window of an Italian restaurant in Soho, one of London's bohemian resorts.

The West Australian Labor party adopted a resolution opposing Australian participation in any war except for defence or in conformity to the expressed wish of the people.

Ottawa city council passed a resolution calling for compulsory superannuation next Dec. 31 of all permanent civic employees who have reached the age of 65.

Preliminary investigation looking toward establishment of an air line linking Denmark, Scotland, Iceland, Canada and the United States will be begun immediately by a newly-formed company.

The Egyptian cabinet has authorized a credit of £200,000 (about \$1,000,000) for the purchase of war materials and munitions, which it is understood will be made from Great Britain.

This Morning THE DIONNE 'QUINTS' HAD QUAKER OATS

For a few cents, your children may have the very same brand of oatmeal selected by the experts in charge of the Dionne 'Quints.' They got Quaker Oats even before their first birthday because they're the best and a world of good. Quaker Oats is the only oatmeal which has SUNSHINE VITAMIN D, the vitamin that makes strong bones. And...

Doing Important Work

Observe Seamstress Weaving Silk Strands On Liner's Compass Card

Important contribution to the safety of the new giant liner, Queen Mary, is being made by a little seamstress living in obscurity at Glasgow, Scotland. Her name is Miss Rankin, 16, of Ben Venue street, to whom has been allotted the task of weaving gossamer strands of silk on the magnetic compass card, made of flexible material. Lightness with strength are necessary with the compass card and these strands, which must be perfect, exactly achieve the purpose. This accomplished, Miss Rankin's delicate fingers then sew on the magnetic needles.

"They have to be adjusted to a thousandth of an inch," Miss Rankin said. "A fractional error in fixing the needles can put a ship far off her course."

Miss Rankin works to this astonishing accuracy with the aid only of ordinary spectacles.

After years at the job she can tell almost instinctively by her fingers whether the magnetic needles are exactly in place.

Ships all over the world use compasses which have passed through her hands. "Does it thrill you?" she was asked.

"I suppose it ought to," was the reply.

Claims X-Ray Eyes

Heavily Bandaged Kashmir Indian Read Book He Had Never Seen

With his head swathed in bandages save for an aperture for the nose, Kuda Bux, a Kashmiri Indian, rapidly from a book he had never seen before learned English words used in London recently. They included Professor Edward Andrade Quain, Professor of Physics at London University, Dr. J. G. Porter-Philips, superintendent of the Bethel Hospital, Royal Hospital, and Dr. C. Jennings Marshall, the surgeon. Dr. Marshall bandaged the Indian placing two lumps of sticky dough over the eyes. On these was laid a large pad of cotton round which a broad bandage was tied over the face, on either side of the nose, and another passed over the mouth. Kuda Bux is known as "the man with the X-ray eyes."

Scientists Find Coldest Spot

Temperature in Siberian Town Is Minus 102 Degrees

Soviet scientists have just decided that Di-Mekon, in Eastern Siberia, is the coldest place in the world. This is why. Water thrown from a bucket there freezes before hitting the ground and instead of splashing breaks. The usual temperature there is minus 102 degrees Fahrenheit. But the inhabitants don't mind. On the contrary they complain of the damp in Moscow.

Encouraging Hog Raising

In order to utilize larger quantities of skim milk and buttermilk from the province the Livestock Branch of the British Columbia Department of Agriculture is initiating a campaign, particularly in the Fraser River Valley, to encourage hog raising. Increased production will be encouraged by financial and advisory assistance.

SUNDAY SCHOOL LESSON

OCTOBER 20

THE MESSAGE OF JEREMIAH

Golden text. Hearken unto my voice, and I will be your God, and ye shall be my people. Jeremiah 7:13

Lesson: Jeremiah 7:1-26.

Devotional reading: Psalm 96:7-13.

Explanations And Comments

Jesus and His disciples, verses 1-7. Jeremiah stood in the gateway of the temple at Jerusalem and warned the people that true religion lay in amending their ways and not in mere ritual. The temple could not save them. The most vivid repetition of the words "temple of Jehovah" suggests the energy of iteration that belongs only to Eastern fanatics. Dean Stanley observes: "Religious enthusiasm is like the fanatical scenes in the theater of Ephesus. 'Grecia is Diana of the Ephesians,' Act 19."

Ramadan Evils, verses 8-11. Jeremiah did not come to accuse the people of flagrant sin, whatever the consequences to himself might be of such boldness. He accused them of breaking the commandments against God, of false witness, pride and idolatry, and keeping up a pretense of worshiping God, coming to the temple and saying, "We are delivered," by the discharge of formalism, we are not free for the return to wickedness.

In this house, which is called by my name, become a den of robbers in your year. But even I, when I see it, with Jehovah. Recall Christ's words in Mark 11:15-17.

To Obey Is Better Than Sacrifice, verses 21-23. "Add not burnt offerings to your sacrifice, and at your flesh: multiplying your victims ad libitum; it will avail your naught" (Dummelow). The next verse need not be more than "a forcible orator" (Dummelow), not even so much as no ceremonial laws were given to Israel when brought out of Egypt, but that the pronouncement of the Ten Commandments on Sinai there was no direction concerning sacrifice" (Dummelow).

Hearken unto my voice, and I will be your God, and ye shall be my people; and walk ye in all the way that I command you, that it may be well with you.

REGAIN VIGOUR quickly

Don't stay low in bodily health and spirits. Do what thousands have done. Take PHOSFERINE. And recapture fresh, vigorous buoyancy quickly.

Take PHOSFERINE. It is a special Tonic, will do that for you, as it has done for thousands in England and Canada.

From the very first day you take PHOSFERINE you will feel better, sleep better, eat better. PHOSFERINE is a complete debility, reduced tone, loss of appetite, nervous energy, indigestion, rheumatism, grippe, neuralgia, neuritis and loss of appetite.

Get PHOSFERINE from your drug store—in liquid or tablet form—at the following prices: 10c, 25c, 50c, \$1.00, \$1.50. The 10c size is nearly four times the 50c size, and the \$1.00 size is twice the \$1.00 size.

PHOSFERINE is splendidly effective at all ages for combating fatigue, sleeplessness, general debility, reduced tone, loss of appetite, nervous energy, indigestion, rheumatism, grippe, neuralgia, neuritis and loss of appetite.

The average tea consumption of the people of Great Britain is about five cups each day of their lives. As this figure includes babies and those few who never drink it at all, it is obvious that the consumption must be higher than that. Enquiries recently made in London and elsewhere have disclosed that a daily consumption of ten and twelve cups is by no means uncommon, and that there are many people who habitually drink even more than that. So far the champion tea drinker appears to be a woman living in Bristol who claims that she never drinks less than thirty cups a day, and that she has never been ill in her life. Even Dr. Johnson drank only twenty cups a day.

"Last Sabbath," said an elder with glee, "as I was coming out, a clever chiel from Dumfries came along the road whistling as happy as if it was the middle of the week. Well, eors is a God-fearing set o' lads, and they nearly killed him."

Saving money for a depression helps to bring one on.

Quaint WEDDING CUSTOM

When wishing happiness to the bride, many Russians still prepare bread and salt. Our card and story cards like this are told in picture and story in our new booklet for children, "Salt over the World," a stirring story of many lands. You would like to read it, of course, so just send the coupon now. The book is free.

Protect Your Children!

Golre is widely prevalent! Use WINDSOR SALT weekly for protection. Cleanses and gives natural lustre to the hair.

PATTERN 5448

Personality—the chief feature of a good mascot or an adored toy. Here it is in this curly-eared, curly-tailed dog. Maybe he's a Pomeranian and he's a bit of a rascal, but he's a good boy. He's a boy-buster, but he's a joyous toy. His tail is a lovely handle; his floppy ears are seen in so securely even pulling can't dislocate them! And his tail will be just as part as this when you make the dog, for it's properly stuffed. As a mascot, he'd be lovely in a gay print or real loud velvet—no mascot must be head, of course.

In pattern 5448 you will find a pattern and detailed directions for making the dog, and material requirements.

To obtain this pattern send 20 cents in stamps or coin (coins preferred) to Household Arts Dept., Winnipeg Newsprint, Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

A Sky-Scraper Man

Measures Seven Feet Six Inches And Is Still Growing

The world's tallest man must surely be Hans Shultz, who, not long ago at the age of twenty measured 7 feet 6 inches in height. He was examined by doctors who believe that according to his record, he will rachit nine feet before he stops growing. It takes six and a half yards of material to make him a suit. All his relatives are normal in height. Hans' ambition is to become a film star. A club was founded recently in Yorkshire for men who were over 72 inches in height. They clubbed together to protest against small chairs, inadequate leg-room in cinemas, and dwarfed head-room in trains and buses.

A new type of school has been opened in Tokio, Japan, under auspices of the war department for the purpose of teaching daughters and sisters of army men how to become perfect brides of military men.

AUSTRIA AND HUNGARY DISSENT FROM SANCTIONS

Geneva.—Austria and Hungary both formally dissented from sanctions against Italy. They led the way in opposition when discussions opened in the assembly.

Experts pointed out that the opposition by Austria and Hungary meant merely, in the event of a vote favoring the sanctioning of Italy, that those two nations would be exempt from participating in whatever sanctions were decided upon.

The assembly meeting opened immediately after the session by the body's steering committee which recommended that a commission on sanctions, to co-ordinate the work of the council and assembly, be created at once.

Count Phunge said Austria was loyal to the league but that it was linked to Italy with tie of the warmest friendship. "At a fatal moment in Austria's history," declared the Austrian baron, "I was Italy who contributed to the safeguarding of the integrity of another member of the league."

(He referred to the moment last year when Chancellor Dolfusse was assassinated and Italy moved up an army to the southern border ready to march into Austria in case of need.)

Hungary's delegate, László Develes, said: "Hungary bears with grief of measures about to be applied against Italy, which so frequently and effectively has shown its friend-ship toward Hungary."

The Canadian delegation, it is understood, will vote in favor of the report of the committee of six powers which found Italy guilty of resorting to war in defiance of the league covenant.

But Canada will not be represented on the sanctions committee which is to represent both the council and the assembly and which will study the best ways of sanctions application.

The question of Canadian representation on the committee was discussed in private between empire delegates but, it is understood, G. Howard Ferguson, Canadian high commissioner to Great Britain and a member of Canada's delegation, suggested that in view of its closer association with the east African problem the Union of South Africa would be a more appropriate appointment on this committee. This suggestion was followed. As a member of the league council, Australia will probably also be on the committee.

Appeal Was Rejected

New Jersey Court Decides Death-man's Sentence Must Stand

Trenton, N.J.—The highest court in New Jersey—the court of errors and appeals—upheld the death sentence conviction of Bruno Richard Hauptmann for the kidnap-murder of young Charles Augustus Lindbergh, Jr.

Appeals to this court are usually denied unless there are extenuating circumstances.

He may also appeal for a new trial on the basis that new evidence has been discovered. And he may also appeal to the supreme court of the United States. His attorneys have said they will carry the case to this last and highest tribunal.

Plot Of Gangsters

Alleged Plan To Liberate Prisoners United States

San Francisco.—Police Chief William Quinn disclosed that his men had been on guard for a year against a plot of gangsters to attack the United States government's Alcatraz Island with a heavily armed police boat and deliver some of the worst desperados.

James Johnson, Alcatraz warden, said he had not heard of such a plot but "anyone trying to storm this prison will get hot reception." The prisoners include Al Capone, George "Machine Gun" Kelly, Harvey Ballay, Albert Bates and John Paul Chase. Quinn said the police boat, D.A. White, still was being guarded.

Project Again Inaugurated

Saskatchewan Lambs May Be Shipped To East For Finishing
Regina.—The Dominion lamb feeding project which has been operating in Saskatchewan for the past two years has again been inaugurated for 1935.

Under this policy Saskatchewan lambs may be shipped to eastern Canada to be fed and fattened and then sent for market.

The sheep farmers of the Maple Creek area, who are members of Southern Saskatchewan Wool Growers' Association, are co-operating with the Dominion government and are consigning lambs for eastern feeding under the rancher-feeder agreement.

Farmers who are approved under the plan will not be required to lay out any cash. Freight charges to the eastern feed lots will be prepaid by the Dominion department of agriculture, reimbursement being made from the proceeds of sale when the lambs are marketed.

Under the rancher-feeder agreement for 1935, the feeder receives the value of all the gain in weight, plus 60 per cent. of the spread after freight and marketing charges have been deducted.

The rancher receives \$3.75 per hundredweight (Moose Jaw weights) plus 40 per cent. of the spread.

Experiment With Crows

University Of Alberta Releasing Birds With Leg Bands

Edmonton.—Hunters of the prairies need not be surprised this week if their kill includes a very black crow with the stern feathers painted a brilliant yellow.

Prof. William Rowan of the University of Alberta, is carrying on a new experiment with crows.

A shipment of 75 crows will be sent to Winnipeg, and somewhere west of Manitoba's capital, far from familiar landmarks, the birds will be released.

Before leaving here, the birds will be subject to the administrations of a body-finishing expert in a local automobile plant. Each crow will get the stern-feather coating of yellow. Also, each bird will be banded. Hunters are asked to shoot on sight and return the leg bands here. Cash prizes will be awarded to the return of the bands.

Reclaiming Dry Area

Large Area In Alberta Districts Will Be Re-Grazed

Calgary.—Conversion of drought-stricken farm areas of Alberta to good range country is included in plans being completed by the commission operating under the Dominion Farm Rehabilitation Act, it was announced here.

A large acreage will be re-grazed in several districts and community water conservation projects are going ahead rapidly, it was stated. It was expected tenders would be submitted shortly for drilling of gas wells on the Red Deer river and the Bjork flat near Buffalo was surveyed. The site of the proposed well was located.

Well Known Engineer Dead

H. N. Spicer Made Trip Across Australia In 1894

New York.—Harold Norman Spicer, 70, director of the Dorr Company, Inc., engineer, and widely known in mining circles, is dead. Mr. Spicer was a member of the first party of white men to cross Australia from east to west, making the trip in 1894 while engaged in metallurgy and general mining in the Australian gold fields. He had engaged in metallurgical work in virtually every country of the world with the exception of South America. Mr. Spicer was born at Bradshott Hall, Hants, England.

Freshmen At Queen's

Kingston.—New regulations are announced for freshmen and freshettes at Queen's University here. Upper classmen have ordered freshmen to carry their books to lectures in six-quart fruit baskets and must supply matches free to any upper class man. Freshettes must wear gray cotton socks.

Administrator

Sir Lyman P. Duff, who will take the place of the Governor-General during the period of the departure of the Earl of Bessborough and the arrival of Lord Tweedsmuir.

Bravery Of Constable

Shot Out Lights Of Bandits' Car After Being Fatally Wounded

Calgary.—Bravery of Royal Canadian Mounted Police Constable George C. Harrison after being fatally wounded by three young gunmen near Camrose, Alta., probably saved the lives of two of his companions, Constables G. E. Coome and Grey Campbell, it was stated in a report submitted to detachment headquarters by Sergeant J. W. Casway.

Shot in the neck as he approached the bandit car with Sergeant T. S. Wallace, who also suffered fatal wounds from a volley of revolver and rifle fire, Harrison toppled into the ditch and from there calmly shot out both headlights of the gunmen's car.

This action plunged the scene into darkness and the fugitives were unable to see the other officers. Harrison emptied his gun, reloaded and emptied it again before losing consciousness.

Roosevelt's Sons In Crash.

Boston.—Two sons of President Roosevelt, John and James, crashed through a guard rail at a grade crossing in John's light car here in the path of an oncoming electric train. John was badly shaken up, but his eldest brother emerged unscathed from the accident.

More Sanctions

Istanbul.—Turkey has suspended all exports to Italy after it was learned that the Balkan and Little Ententes had decided to support League of Nations sanctions against Italy.

AN AMAZING DEMONSTRATION BY FIRE WALKER

An unusual demonstration took place in London recently when, under the direction of the University of London Council for Psychical Investigation, an Indian named Kuda Bux walked across a pit containing red hot wood and charcoal. The pit contained seven tons of oak logs and half a ton of charcoal, and when the temperature was 800 degrees Fahrenheit. Kuda Bux walked barefoot across the pit and back again without sustaining any harm or burns. Here we see him performing the feat which amazed the spectators.

Italian Suspects Arrested

Bank Director Among Others Held By Malta Police

Valeta, Malta.—British authorities arrested a number of suspects on espionage charges, among them Signor Parodi, director of the Italian Banca di Roma branch in Malta. These suspects were rounded up after three Italians and a British subject were arrested. The British subject was the son of an Italian and worked for an Italian Steamship Company.

Police raided the offices of several Italian shipping companies, but except for the arrests would give no information on their activity. Three Italians were expelled from Malta after having been arrested several days before for anti-British activity and suspicion of espionage.

Rome.—Arrests of nine Italian subjects by authorities of Malta, British base of Sicily in the Mediterranean, for reasons not made public, was reported without confirmation in informed Italian quarters. The report aroused irritation, but officials declined ed comment.

Meteorite Fires Straw Stack

Threshing Machine Saved By Quick Action Of Men

Vegreville, Alta.—Rain and snow halted threshing operations on many farms but the peak in astronomical interruptions was reached on the farm of C. W. Coombe near here when a meteorite crashed into the straw pile, set it afire, sent frightened horses galloping to distant fields.

The separator owner, S. A. Sunfellow, ran his horse to the burning pile and the threshing machine was pulled to safety from the burning straw. A fireguard was hurriedly plowed to protect the stooked crop and buildings.

New Royal Prince

No Name Yet Announced For Son Of Duke And Duchess Of Kent

London.—Great Britain's newborn prince was thriving, according to latest reports from the residence of the Duke and Duchess of Kent. It was officially announced that the child's weight was 6½ pounds.

The child's name has not yet been announced. There will be four Christian names, most likely including George and Edward. They will be chosen by his royal parents and will be submitted to the king for his approval.

Speaker From West

Toronto.—C. W. Peterson, editor and publisher of the Farm and Ranch Review, Calgary, was guest speaker at the 22nd annual dinner-meeting of the Association of Canadian Advertisers here.

FIERCE FIGHTING REPORTED FROM THE WAR FRONT

Paris.—Despatches to the Paris Soir from the Eritrean front stated that fighting is general throughout the northern Ethiopian sector with 300,000 troops engaged in a quadrangle formed by Adi Ugri and Adi Kafe, in Eritrea, and Adigrat and Aksum, in Ethiopia.

The fiercest fighting, said the despatches, was on the outskirts of Aksum which was reported encircled by Italian columns but not yet captured due to the heavy fire of Ethiopian sharpshooters hidden in the hills commanding the city.

The despatches also said an Ethiopian plan to cut the Eritrean railroad at Massawa collapsed when attacks at Adi Ugri and Adi Kafe were repulsed. What was described as a third attack on Adigrat, which is in Italian hands, was said to have failed.

The Soir's report said, Ethiopians attempted to recapture Adiwa and were thrown back after three attacks, the battle lasting until dawn with heavy Ethiopian losses.

Large numbers of Italian wounded, the despatches said, were being moved to the rear.

The picked troops of the Ethiopian chief were dug at dawn in a spectacular cavalry, machine gun, and howling spear-beater attack, the newspaper said, inflicting heavy losses on the Italians and forcing them to retreat.

Ethiopia's defence council prepared for a new Italian offensive in the Weyda sector as stringent military censorship was put into effect. Each news correspondent was restricted to cabling or telegraphing not more than 100 words daily.

Authorities declared that the vast wordage sent out by newspapermen during recent weeks had so encumbered communications that the exchange messages necessary for the conduct of government business had been handicapped seriously.

Officials also expressed their displeasure at the flood of false reports emanating from the three fronts, and appointed a group of Belgian officers to issue authoritative bulletins on new war developments.

Spending Millions On Arms

France Announces Program For Armament Production In 1936

Paris.—Marcel Regnier, minister of finance, announced that France was spending 5,439,000,000 francs (\$364,650,000) on armaments in 1936.

"When Europe and the whole world is ringing with the sound of arms," he told the chamber of deputies' finance committee, "it is no time to renounce financial sacrifices."

Emergency arms appropriations are added to the regular army, navy and aviation budgets.

With these additions, the national defence expenditures will be 12,142,000,000 francs (\$801,372,000).

Grain Elevators Full

Calgary.—An embargo against incoming shipments of grain was placed by the Canadian government terminal elevator here. With more than 2,000,000 bushels in the bins and a considerable amount en route, officials decided only shipments on the way will be accepted until outward movement, either east or west, is resumed.

Puzzles For Executives

Kitchener, Ont.—Settlement of a Kitchener estate is being delayed as part of the assets consists of an account in an Italian bank. Written requests for the money have brought replies it will not be sent out of the country. The executor is considering buying a cargo of olive oil in Italy and selling it in Canada.

Ontario County Keeps Law

Whitby, Ont.—"Although there are 45,000 people in Ontario county, we have no law-breakers," Crown Attorney G. D. Conant told Mr. Justice R. D. Hogg when his lordship opened the fall assizes. There were no criminal cases for the court.

How She Does It.

"How is it," inquired the bride of an older married woman, "that you always manage to have such delicious beef?"

"It's very simple," said the older woman. "I first select a good, honest butcher and then I stand by him."

"You mean that you give him all your trade?"

"Oh, no! I mean that I stand by him while he cuts the meat."

Novel Experiment.

Dairies in the U.S.A. have been using the new transparent straws made of "Cellophane" in promoting the consumption of milk.

They found that these were particularly appealing to children, who were generally fascinated by the sight of the milk passing thru the straws and drank more as a result.

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14. Ducks, geese, Sept. 16 to Nov. 14. Elk, Oct. 1—Dec. 14.

Holborn Happenings.

The Lutheran Peace Church in Holborn will be dedicated Sunday October 27 (Manitoba Synod, Rev P. Hauseman) There will be service in morning and afternoon.

The Busy Bee Club are having a movie picture and dance Friday October 18 at Holborn hall.

One of the biggest features of the season. 5 reels, Fanga of Destiny.

Two reels, Miss Walks in Her Sleep.

Also a Hilarious Comedy, starts 9 p.m.

Telfordville Orchestra. Everybody welcome.

Brightbank Notes.

Mrs Herman Steller left last week for her home in Germany.

Messrs Walter Clausen and Don McDonald returned on Friday from a trip to Edmonton.

The Farmers in this district are practically all thru threshing operations. With some of the farmers the grain did not turn out as good as expected.

A number in the district are hoping to soon get their Alberta dividends. A few who say they're in need are hoping it will be promised 70 bucks a month.

Mr F. K. Godfrey has left the district, and will reside in Medicine Hat.

Mr John Kotcherofsky, the noted exponent of social credit, has been taking a deep interest in the outcome of Monday's voting.

Mr Karl Grosskopf, Brightbank's enterprising farmer, left last week for his former home in Northern Europe, and quite a number of his neighbors and friends were at the station to bid him "bon voyage." Karl has been summoned home, to be present at the settlement of the estate of a close relative, and by which he will probably be the recipient of a hand some bequest. It is rumored, sub rosa, he may return with the hereditary title of Count Karl. He has promised to keep his friends posted on the details of his travels, and these should prove interesting and make very good reading. His six-day rail trip should bring him to Halifax, where he will take passage on the Scandinavian-American liner SS. Darmstadt, with the first stop at the Free City of Dantzig.

S. of A. Opens Oct. 29.

Due to the fact that harvesting operations have been later than usual in parts of Northern Alberta Minister of Agriculture Chant has decided to set the opening date of the Vermilion School of Agriculture for October 29, rather than the date first chosen, October 22nd.

The Agricultural work as given at the school is for boys, and the opening and closing of this school is designed, as far as possible so the boys may see the fall work well out of the way before they leave the farm, and on the other hand they may be home in time for the spring work.

The Home Economics work is for all girls, as it is largely a home makers course.

Both classes are free in that there are no tuition fees of any kind, and only the board and room for 5 months at \$24 a month.

THE NEWS OF STONY PLAIN AND DISTRICT.

Mr J W McCullum resumed his duties at the local station yesterday, after a short vacation. The relieving operator, Mr Spurgeon, has returned to Edson.

Mr G Clarke, of Hinton, was visiting friends in Stony Plain over the week end.

Mr Sam Zucht is up at Hinton, engaged in trucking gravel for the Jasper highway contractor.

Mr Ed Reinhart, Blueberry district, had a successful sale of stock and machinery on Friday last.

There will be Lutheran services in English Sunday Evng. next, in Stony Plain. Rev H Kuring, pastor.

Kelly's Hall was well filled Saturday Evng. when the German picture Das Maedel von der Reeperbahn was shown. This picture pleased intensely those from the Homeland who viewed it, and proved also very interesting to the young folks. Another of Mr Steller's showings will surely be welcomed in a very hearty manner.

The S. P. Junior Hockey Club have arranged to hold a masquerade dance on Hallowe'en, Thurs. Oct. 31. Kelly's Hall.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

BUTTER AND EGGS WANTED
at The Royal Cafe.

Bazaar, Sat. Nov. 30.

The Ladies Aid of St. Matthew's Church (Missouri Synod) will hold a Bazaar on Sat. Nov. 30, St. Matthew's School, Stony Plain.

EXPLANATION OF WHEAT BOARD OPERATIONS.

Wheat growers should not confuse the operations of the Canadian Wheat Board with the stabilizing operations conducted by John I. McFarland over the past few years. It should be clearly understood that there is no "peg" on prices on the Winnipeg Grain Exchange this year as was the case last year. Prices may vary up and down without interference from the Wheat Board. The Wheat Board, however, stands ready to pay an initial price of 87 1-2c bu. basis No. 1 Northern at the terminal at any time. The Board will then dispose of the wheat delivered to it over the marketing year. When its operations for the year are completed it will distribute any further sums realized from the sale of wheat over and above the initial payment to those who have delivered wheat to it, provided the disposal of the wheat yields such additional sums.

In other words, those who now sell on the open market accepting payment on current market values cannot expect any additional money. Those who sell through the Wheat Board, on the contrary, will participate in any further money that may be obtained on final disposition of the wheat. It should be clearly understood that a settlement made on the basis of open market prices is final and wheat cannot later be transferred to the Wheat Board and participation certificates issued covering the same.

*They're All Necessary Foods
But All Acid - Forming.
Hence Most of Us Have "acid
Stomach" At Times. Easy
Now to Relieve.*

Doctors say that much of the so-called "indigestion," from which so many of us suffer, is really due to the fact that we have eaten by too many acid-forming foods in our modern diet. And that there is now a trouble, relieve this . . . often in minutes!

Simply take Phillips' Milk of Magnesia after meals. Almost immediately this acts to neutralize the stomach acidity, that brings on your trouble. You "forget" you have a stomach!"

"Try this just once! Take either the familiar liquid "PHILLIPS'" or the new Phillips' Milk of Magnesia Tablets. But be sure you get Genuine "PHILLIPS'".

Also in Tablet Form!
Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tablet contains 1/2 oz. of a teaspoonful of the famous Phillips' Milk of Magnesia.

SYNOPSIS

Nancy Nelson was a sub-deb, a irresponsible girl of nineteen, who care beyond her looks and costume in her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with a difficult and simple method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbus's offer is accepted. Nancy and her arrival at Pine Ridge, Jack Nelson, Matthew Adam, and Nancy go to the prairie home of Matthews' uncle for the ride, and after Nancy and Jack leave for home, the two boys are left alone. Bitten by the swirling snow they collide with a bus full of school children, which was stalled across the road with its back wheels resting in a snowdrift. The bus driver, who was shocked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard.

Now Go On With The Story

CHAPTER XX.

Long as he lived Matthew Adam was never to forget the terror that possessed him when, after hours of tramping snowdrifts, he stepped into hands gently.

For Baking QUAKER NATURAL BRAN IS More economical-Gives better results

QUAKER NATURAL BRAN is a special cooking bran. Because it is natural bran it mixes better, rises lightly and makes bran muffins, cakes, cookies and bread more delicious, more appetizing. And it's much more economical for baking than prepared bran.

If you've never used Quaker Natural Bran you don't know how delicious bran dishes can be—try it and enjoy that real natural bran flavor!

QUAKER
Natural BRAN

Meat Paste Sandwiches
Fish Paste Sandwiches and Tea
Look for the Quaker Natural Bran display at your grocer's. He has all the things you need for this meal. The bran is resealable and Date Bran Gems is in the package.

that stalled school bus. And, perhaps strangely, his first glance fell, not on Nancy, but on the mound of apparently lifeless children beyond her. Then, all in a breath, they focused on the girl herself—a girl only half clad, her hands moving mechanically in an effort to bring circulation into a boy's small feet which were, it transpired later, not frozen so badly as her own. Her head, drooping forward on her breast, lifted with difficulty as the door opened, then dropped again, but not too soon for Matthew to have seen the glassy look that clouded her blue eyes.

"Nancy!" he cried. Just that. He was on his knees—had snatched at the fur coat and wrapped it 'round her. It seemed to him that the girl fought back the overpowering drowsiness by a supreme effort. One hand groped for his cheek, as if to make sure that he was flesh and blood. She struggled to speak—struggled so valiantly that Matt's eyes misted with pity when, after a moment, the words came:

"Find . . . Jack . . . And . . . and then take . . . the children. I am . . . all . . . all right."

After that Nancy knew nothing at all for a long time. She retained only a confused memory of rousing for a moment to find herself in a room that seemed very full of people; wondering why Matthew Adam and a strange woman were packing snow about her legs; and hearing a child cry out as if in pain.

She recalled that later (how much later it was impossible to say), she had cried herself with such pain as she had not imagined; and then things blurred again. Even the long ride to the hospital was but a dim remembrance of being wrapped in blankets and held tenderly in strong arms. Once, they told her, she opened her eyes and asked for Jack, but drowsed again before the answer came.

Her first clear memory was walking to a sense of intense suffering, and seeing bright sunlight dancing across her bed. It was a warm bed in a white room and a white-clad woman was speaking to a shadow in the door. Nancy's eyes travelled upward and saw a cap. So the woman was a nurse. And thus must be a hospital. "But why am I here?" she asked herself confusedly. "And what has happened to my legs?" Then she remembered! Those dreadful hours of cold and hunger—those helpless children—Jack facing the blizzard all alone. And suddenly Nancy was just a little girl again, a frightened little girl who yearned for the comfort that had never failed her when life seemed cruel—and life had never been so cruel before. She said, her voice breaking a little: "I want—I want my mother."

"Thank God!" said the nurse; and the tall shadow in the doorway turned into Matthew Adam—a gaunt and haggard Matthew to be sure, but comfortably familiar amid the strangeness. Two quick strides brought him to Nancy's bed, and bending down he lifted one of her

"Thank God!" he said, just like the white nurse; and then anticipating the question she was too weak to ask: "Jack got there, Nancy. He reached Bartlett's before us; but the wires were down so Mrs. Bartlett couldn't call for help, so her husband was hunting for cattle in the drifts. But if Jack hadn't been there's no telling what would have found Nancy. She was all in, of course—but he will be all right."

This was Matt's verdict, not the doctor's; nor did he add that Jack was only a room away, fighting pneumonia. Time enough for that knowledge when she was stronger. Then the nurse warned: "That's all for now, Mr. Adam," and Nancy opened her eyes, which had grown sleepy, and asked: "The—children?"

"All safe," Matt answered; then, as a cry of pain escaped her, "Oh, Nancy! Is it as bad as that?"

"And—Jack?"

There was a noticeable pause before Matt answered steadily: "Don't worry about Jack, Nancy. That kid's the dandiest fighter you ever seen!"

The nurse turned at this, and going to a window, did something unnecessary to the curtain; while Matt, bending down, said quietly: "Is there anything I can do before I go, Nancy?"

"You're so tired, Matt," she answered with irrelevance.

He smiled at that and didn't look so tired after all; but the girl said: "You won't drive up the pass to-night, will you? Promise you won't—or I'll worry."

"I promise. I'll stay down here with John. Mother thought—Miss Columbine might need me in the morning—for errands or something," he adds hurriedly. "Now be a good girl, Nancy, and go to sleep."

"Couldn't you stay till I drop off?" she pleaded. "I'm kind of—home-sick."

Matt glanced at the nurse, not knowing what rules there are in hospitals; and at a nod sat down by Nancy's bed.

"We can't let you be homesick," he told her gravely, "but you mustn't talk."

As the nurse (smiling in a manner that would have brought a blush to the young man's cheeks if he hadn't been so utterly, unself-conscious in that moment) turned down the light and left them for a little time, it seemed to Matt that all his weariness had dropped away. Nancy wanted him there! No matter what happened, he'd always have that to remember. He might be awkward and

Find Out

From Your Doctor
if the "Pain" Remedy
You Take Is Safe.

Don't Entrust Your
Own or Your Family's
Well - Being to Unknown
Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism; neuralgia or whatever you feel—ask what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were dangerous against physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that its safety and findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and its common pains . . . and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get "ASPIRIN"

baful where most girls were concerned, but now, when she was weak and suffering, the one girl in the world had asked him to stand by. After all, life was pretty wonderful, thought Matthew Adam, forgetting in the moment, the grim fight wagging in the room beyond.

HEALTH-GIVING MINERAL SALTS IN SASKATCHEWAN LAKE

WATERS OF LITTLE MANITO RICH IN NATURE'S MEDICINES

FOUND MORE ABUNDANTLY HERE THAN IN OTHER WORLD FAMOUS SPAS

More and more the marvellous heritage of Canada is impressed upon Canadians.

More and more, Canadians talk about the wonders of Little Manitou Lake—whose curative waters abound in health giving minerals. More and more, the waters of Manitou Lake are being utilized near Watrous, in the Province of Saskatchewan.

Tons of Salt Crystals gathered from the Canadian Lakes—scientifically refined and packed in boxes—high grade and non-eiferent—are sold through your retail Druggist under the name of SASKASAL. Like the famous waters of Carlsbad, Saksal is remarkable in the treatment of Rheumatism—Neuritis—Mild Stomach Disorders—Kidney and Liver Troubles—Impure Blood—Skin Eruptions

If you are not enjoying vigorous health, or if you suffer from any of the above complaints—try a treatment of "Saskasal". One size pack—only price 60c. Let us send you a FREE sample.

THE FARMER AS A CONSUMER.

Slowly it has been driven home to the farmer that he is a consumer. When a farmer discovered himself as a consumer, he made the greatest discovery ever made in the field of agriculture. This is more important than discoveries about vaccines, rust or blight. It revealed to him his place in the economic world. Now he is moving forward because he is organising as a consumer. His leaders are catching the vision of a different motive in industry and of a better kind of society.—Dr. J. P. Warbas, Co-operative League of the U. S. A.

Summary of Election Results.

The Federal Contest in which There Were a Record Number of Co-testants for the 245 Seats, and in which There Were 15 Women Candidates.

The social credit forces repeated on Monday their performance of Aug. 29 and practically swept this province by victories in nearly all the 17 ridings.

Stony Plain Town.

Bevington, CCF. 20
Kuhl, Soc'l Credit. 100

Stewart 4926

Edmonton City.

In East Edmonton 6 candidates were running. Dr W. S. Hall being the "regular" candidate, backed by the advisory council. and Dr R. C. Ghostley, the "Protest" nominee. The result of the polling showed—

Ghostley 450
Hall 5645
McLeok, Lib. 4906
Dolan, Comm. 669
Bowen, Cons. 3110
Roper, CCF. 1924

In West Edmonton there were 5 candidates, among them being J. A. Reid, the social credit organizer well known in this district. Following is the result—

Ogilvie, Cons. 4777
Crawford, CCF 1960
McKinnon, Lib. 6587
Burrows, Recon. 1025
Reid, S. Credit 3642

IN ALBERTA.

Why Production Increased.

The Dominion Bureau of Statistics reports the production of salt has increased eleven per cent in 1935 as compared with last year. The Edmonton Journal says, no doubt the heavy demand was due to the necessity of having to take so many political speeches with a pinch.

Gyping the Public.

A few weeks ago the Canadian Radio Commission sent out a press notice that owing to the fact that so much time had been leased to the political parties it was impossible to give the regular feature programs for a few weeks. In other words, after soaking the public \$2 for a license presumably to provide entertainment they are unable to fill their part of the bargain.—Edson Signal.

Since Confederation.

Since 1867 the government of Canada has been divided politically as follows:

	Years	Months
Conservatives	35	3
Liberals	28	6
Unionist	4	6

Election Notes.

Number of seats in the House of Commons, 245.

Number of contestants in this election, 894.

Number of eligible voters were 5,917,387.

The number of lady candidates were 15.

There was a fight in every constituency, with the number in some running as high as six.

No one was accorded an acclamation, not even the leaders of the principal parties.

Not as many votes were cast at Stony Town poll as on Aug. 22d. There is said to have been over a hundred who did not exercise their franchise.

J. A. Reid, the well-known Social Creditor, was defeated in Edmonton West by the Liberal candidate. Exception had been taken to Mr. Reid by some voters, on account of his not being a resident of the Riding.

People in Great Britain were taking quite an interest in the Canadian election, as indicated by the fact that wagering on the election at Lloyd's, London, was on the basis of the Liberals winning 166 seats.

The Canadian Wheat Board.

Participation Certificates issued to producers who deliver their wheat to the Canadian Wheat Board should be retained in the possession of the producer, since the certificate which instructs producers to surrender these certificates carefully for surrender to the Board when required.

When it becomes necessary for producers to surrender their certificates to the Board, instructions to that effect will be issued by the Board. Meantime, all growers holding these certificates should carefully preserve and retain them in their own possession.

"Beer and Other Luxuries."

Premier Aberhart is quoted with saying, in a recent address, that, so soon as the Government begins to pay "basic dividends" relief will be discontinued in this Province. A work program as a relief measure in addition to a Provincial relief dividend, for which no work would be required, was being considered by the Government. "This would be paid by an unearned increment levy on beer and other luxuries," the Premier is quoted as saying.
